SCR
TECHNOLOGY

FASTER, FUEL EFFICIENT

A SAFE INVESTMENT FOR THE TOUGHEST JOBS

For the toughest jobs, reliability comes with a perfect control of the oil temperature in the axles.

- **For soft soil** where higher grip control and higher resistance are needed:
 - **Effective grip control** with the differential lock on the front axle. It can be activated automatically or manually controlled with the left foot.
 - **No overheating** because the differential lock does not slip
 - **Higher resistance** with heavy duty front and rear axles.
- **For a limited investment**, standard axles with limited slip differential are also available and proven to be reliable.
- **For even more reliability**, we have invented the COOLING BOX that keeps constant the cooling fluids temperature.

LESS MAINTENANCE, LOWER COSTS

- Lower costs because **SCR** uses fewer components:
 - No particulate filter
 - No extra fans for additional cooling
 - No specific oil needed
- Longer maintenance intervals:
 - because the engine oil is not contaminated with unfiltered air
- No break down: **SCR** offers the highest fuel compatibility

PREMIUM ENGINE TECHNOLOGY: SCR

SCR (Selective Catalytic Reduction) is a well-proven reliable solution. Having been in use in Europe since 2004 on trucks, the AdBlue™ DEF is can easily be found almost anywhere.

- More productivity with 10% fuel savings because SCR allows optimized combustion temperature
- No loss of power and fuel because no extra cooling is needed
- Cost savings, as SCR engines can be used with “red” fuel

MORE COMFORT FOR MORE PRODUCTIVITY

Access fit for a King

Getting in the cab is easy; the wide steps and the handle make you feel safe, while the wide door provides unobstructed access.

Outstanding visibility

You'll feel more confident and work faster with the great all round visibility.

The curved rear hood shape is very low because the **SCR technology** doesn't require additional fans for cooling.

All controls at your fingertips

Greater focus on the job and less stress with fewer arm moves thanks to the ergonomic positioning of the control panel under your right hand.

Feel confident with ROPS

All our wheel loaders' cab are reinforced and guarantee the operator protection against roll over (**ROPS certified**).

Great storage space

The overhead radio placement and the storage make the Case cab even more convenient for you
